

Radhika Pathak.

Q.1 - (d)

→ exports, require, module name, filename & dirname we need to specify.

Q.2 - (c)

→ libuv library is used for event loop & used to assist interaction bet'n asynchronous component.

Q.3 - (b)

Q.4. (d) - function, arrays, objects are already defined in the module.

Q.5. (b) - multicore systems are defined in util module.

Q.6. (c) - It is used to read an entire file.

Q.7. (c) -

Q.8. (c) - `JSON.parse()` converts json data to JS which is in key-value pair to JS object.

Q.9. (c) - When we want to group a data together so to check the conditions we use these statements.

Q.10. (d) - (c) - From 0 to 4 loop will execute.

Q.11. (d) - keys are the properties of object. It returns array.

Q.12. (a) - 101 is the length.

Q.13. (b) - keys are restricted to int & strings in object. In map key can be of any type.

Q.14. (c)

Q.15A. (d) $0 \leq i \leq n$ - False since AND operator is there.

Q.15B. (b)

Q.16. (c) -

Q.17. (b) -

Q.18. (d) - If the variable is defined using let it is limited in scope.

Q.19. (d) - `Boolean("false")`.

Q.20. (a)

21. (c)

Q.22 - (c)

Q.23 - (b) - No reason.

Q.24 - (b) - Already defined.

Q.25 - (d) - No reason.

Q.26 - (a) - No reason.

Q.27 - (d) - No reason.

Q.28 - (a) - we can use the values only when they are needed.

Q.29 - (b) - No reason.

Q.30 - (a) - No reason.

Q.31 - (b)

Q.32 - (c)

Q.33 - (c) - No reason.

Q.34 - (b) - No reason.

Q.35 -

Q.36 - (d) - No reason.

Q.37 - (d)

Q.38 - (a) - No reason.

Q.39 - (b) - No reason.

Q.40 - (a) - No reason.

Q.41 - (a)

Q.42 (c)

Q.43 (b)

Q.44 - (d)
